Canonical advisory services

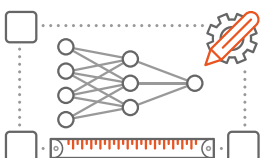

Proof of Concept (PoC)

Before investing in a large-scale implementation, we can work together on the design and implementation of a proof of concept. A POC allows you to have an evidence of viability and raise the confidence in your projects.

Data solutions training

Train your teams to use Canonical data solutions. We offer open-source and proven solutions to operate and manage your data at scale quickly and confidently.

Deployment services

Canonical will support you in designing and deploying your data applications in your production environment. You will be supported by dedicated experts who will deliver an enterprise-grade solution based on your business requirements.

	Proof of concept	Training	Deployment Services
Need	- Have a specific data use case that needs a trial solution and cost-benefit analysis. - A concrete assessment of a data solution.	- Train your teams to use Canonical data solutions. We offer open-source and proven solutions to operate and manage your data at scale quickly and confidently. - Want to get tips and recommendations on best practices and common traps to avoid for a particular database solution.	- Looking for a turnkey solution, from use case exploration to production scaling. - Need experts with data solutions expertise who can temporarily be assigned to the organisation's teams for data solutions deployment.
Expected outcome	- Proposal for a data solution architecture based on customer's use case. - Actual solution based on the use case.	- Training session(s) by industry experts on the targeted Data solutions. - Your organisation will have Canonical Data solutions expertise.	- Canonical provides deployment services for multiple data applications on any cloud or on-prem infrastructure. - Dedicated Data Fabric solution architect. - Dedicated Technical Account Manager.
Deliverables	- POC covering a single use case. - POC based on customer data and infrastructure, or on a public cloud. - Data solutions expertise.	3 days in-person or virtual training on how to use and operate Canonical Data solutions in a production environment. - In-person or virtual training on how to optimise your deployment for specific needs.	- Design workshop - Data solutions training - Deployment guide - Infrastructure optimisation and recommendations. - Dedicated expert assisting you with deployment in your production environment.
Out of scope	Implementation of production-ready data pipelines.	Deployment service in the production environment.	Operating the data solution on a day-to-day basis.
Pricing	Contact us	\$ 24, 500	\$ 50, 000

Canonical delivers security maintenance, support and advanced automation for up to 10 years on a suite of open source data solutions
